## Comparative Statement of Various Pipes for Gravity Sewers

|  | EVALUATION CRITERIA | GLAZED STONEWARE PIPES (IS:651-1980) | $\begin{aligned} & \text { RCC PIPES } \\ & \text { (IS:458-1988) } \end{aligned}$ | UPVC PIPES | $\begin{array}{r} \text { DI PIPES } \\ \text { (IS:8329-2000) } \end{array}$ | $\begin{aligned} & \text { HDPE PIPES } \\ & \text { (IS:14333-2000) } \end{aligned}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1. | Available Length | 0.6m | 2 to 2.5 m | 6 or 12 m | 6 m | 6 or 12 m |
| 2. | Diameters <br> Available | 100 to 300 mm for higher diameters it is not economical. | 150 to 2000 mm | Available up to 630 mm | Up to 1000 mm | Available up to 630 mm |
| 3. | Type of Joint | S\&S joint with caulking yarn soaked in cement slurry or tarred gasket. Joint is covered with cement mortar. | Available in both collar and $S \& S$ joints. | Solvent Cement joint and Rubber Ring joint | Tyton joint with rubber gasket | Butt fusion welding process. |
| 4. | Weight | Light | Heavy | Light | Heavy but lighter than R.C.C. pipes. | Light |
| 5. | Handling | Easy due to shorter length and light weight | Difficult due to heavy weight | Easy due to light weight | Difficult due to heavy weight in larger dia | Easy due to light weight |
| 6. | Roughness Coefficient of Pipe | 0.012 | 0.011 | 0.011 | 0.011 | 0.011 |
| 7. | Corrosion resistance | Not affected by hydrogen sulphide gas. | Subject to $\mathrm{H}_{2} \mathrm{~S}$ corrosion due to acids, | Highly corrosion resistant | Protective layers are required to | Highly corrosion resistant |

|  | EVALUATION CRITERIA | GLAZED <br> STONEWARE PIPES (IS:651-1980) | $\begin{gathered} \text { RCC PIPES } \\ \text { (IS:458-1988) } \end{gathered}$ | UPVC PIPES | $\begin{array}{r} \text { DI PIPES } \\ \text { (IS:8329-2000) } \end{array}$ | $\begin{aligned} & \text { HDPE PIPES } \\ & \text { (IS:14333-2000) } \end{aligned}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Highly corrosion resistant | highly septic sewage and by highly acidic or high Sulphate soils and where velocities are not sufficient to prevent septic conditions. To prevent corrosion Sulphate resistant cement concrete to be used for pipe manufacture. |  | protect corrosion |  |
| 8. | Life | More than 50 years | 30 years | Life is more than 50 years due to highly corrosion resistant. | More than 50 years | Life is more than 50 years due to highly corrosion resistant. |
| 9. | Class of Pipes Available | Grade A \& AA <br> (Non pressure pipes) | NP1, NP2, NP3, NP4 <br> (Non pressure pipes) | $6 \mathrm{Kg} / \mathrm{Sq.cm}, 8 \mathrm{Kg} /$ Sq.cm,10Kg/Sq.cm, $12 \mathrm{Kg} / \mathrm{Sq} . \mathrm{cm}$ | K-7 to K-12 <br> K-7= 12 - <br> $32 \mathrm{~kg} / \mathrm{sqcm}$. <br> $\mathrm{K}-9=25$ - <br> $50 \mathrm{~kg} / \mathrm{sqcm}$ <br> Depending Upon the dia of pipe. | PN 2.5, PN4, PN6, PN10 $(2.5 \mathrm{Kg} / \mathrm{Sq}$, $4 \mathrm{Kg} / \mathrm{Sq}, 6 \mathrm{Kg} / \mathrm{Sq}$ and $10 \mathrm{Kg} / \mathrm{Sq}$ ) |
| 10. | Requiremen ts of Special Equipments | Not required | Not required | Not required | Not required | Welding equipment required for jointing |

|  | EVALUATION CRITERIA | $\begin{array}{r} \text { GLAZED } \\ \text { STONEWARE PIPES } \\ \text { (IS:651-1980) } \end{array}$ | RCC PIPES (IS:458-1988) | UPVC PIPES | $\begin{array}{r} \text { DI PIPES } \\ \text { (IS:8329-2000) } \end{array}$ | $\begin{array}{r} \text { HDPE PIPES } \\ \text { (IS:14333-2000) } \end{array}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 11. | Stacking the Pipe <br> Materials | Can be stacked anywhere. Care should be taken while loading, unloading and stacking. | Can be stacked anywhere. Care should be taken while loading, unloading and stacking. | To avoid exposure to sunlight, it is stacked in covered area. This also requires a special type of stacking to avoid buckling and damage of pipe ends Care should be taken while loading, unloading and stocking. | Can be stacked anywhere. Care should be taken while loading, unloading and stocking. | Same as uPVC |
| 12. | Cost of supplying, laying and jointing of meter length | 200 mm: Rs. 272 <br> 250 mm : Rs: 377 <br> 300 mm : Rs: 517 <br> (DSR $07+10 \%$ Price contingency) | (NP3 Pipe) <br> 350mm: Rs. 1134 <br> 400mm: Rs. 1234 <br> 500mm: Rs. 1568 <br> 600mm: Rs. 2102 <br> NP2 Pipe <br> 200 mm: Rs 248 <br> 300 mm : Rs 441 <br> 400 mm : Rs 578 <br> 500 mm : Rs 855 <br> 600 mm : Rs 1095 <br> (UP JN) | $6 \mathrm{~kg} / \mathrm{cm}^{2}$ <br> 200mm: Rs. 604 <br> (UPJN+20\% for <br> laying \& Price <br> Contngency) <br> 315mm: Rs. 1448 <br> (MP ADB <br> Project+20\% Price contingency) | $\begin{aligned} & \left(25-50 \mathrm{~kg} / \mathrm{cm}^{2}\right) \\ & \text { K9 Pipe } \\ & \text { 200mm: Rs:2442 } \\ & \text { 300mm: Rs:4505 } \\ & \text { 400mm: Rs:5520 } \\ & \text { 500mm: Rs:9418 } \\ & \text { 600mm: Rs:12283 } \\ & \text { (UPJN Supply } \\ & \text { rate+20\% for } \\ & \text { laying \& price } \\ & \text { contingency) } \end{aligned}$ | PE 100, PN- 6 <br> 200mm: Rs. 640 <br> 315mm:Rs. 1585 <br> 400mm: Rs. 2595 <br> 500mm: Rs. 4695 <br> 630mm: Rs. 7434 <br> (MP ADB <br> Project+20\% Price contingency) |

|  | EVALUATION CRITERIA | GLAZED <br> STONEWARE PIPES (IS:651-1980) | $\begin{gathered} \text { RCC PIPES } \\ \text { (IS:458-1988) } \end{gathered}$ | UPVC PIPES | $\begin{array}{r} \text { DI PIPES } \\ \text { (IS:8329-2000) } \end{array}$ | $\begin{aligned} & \text { HDPE PIPES } \\ & \text { (IS:14333-2000) } \end{aligned}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 13. | Remarks on Cost | Comparatively Cheaper | NP2 is Cheapest among all materials | Costlier than RCC pipe but cheaper than HDPE pipes. | Costlier than other pipes but cheaper than HDPE pipes. | Smaller diameter pipes are cheaper and higher diameter pipes are costlier. |
| 14. | Requiremen tin Refilling the Trench | No stone or rock to be filled while refilling. | No stones or rocks to be filled while refilling. | Sand bedding is required to avoid the deflection of pipe due to burden of earth. <br> No stones or rocks to be filled while refilling. | No stones or rocks to be filled while refilling. | Concrete arch bedding is required to avoid the deflection of pipe due to burden of earth. |
| 15. | Infiltration | If joints are week/poor, chance of infiltration is high due to more number of joints. | Infiltration is less if rubber joints are used but joints should be proper if collar joints are used. | Infiltration is very less | Infiltration is very less | Infiltration is very less |
| 16. | Workability | Light weight for easy handling. | For larger diameter due to heavy weight handling to be done with care | Light weight for easy handling. | Good | Light weight for easy handling. |
| 17. | Effect of Radiation | Not affected | Not affected | Affected by UV rays if stored for a long duration in | Not affected | Affected by UV rays if stored for a long duration in open fields |

|  | EVALUATION CRITERIA | GLAZED STONEWARE PIPES (IS:651-1980) | $\begin{gathered} \text { RCC PIPES } \\ \text { (IS:458-1988) } \end{gathered}$ | UPVC PIPES | $\begin{array}{r} \text { DI PIPES } \\ \text { (IS:8329-2000) } \end{array}$ | $\begin{aligned} & \text { HDPE PIPES } \\ & \text { (IS:14333-2000) } \end{aligned}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  | open fields hence it should be kept covered. |  | hence it should be kept covered. |
| 18. | Jointing <br> Skill <br> Requiremen ts | Requires quality supervision | Jointing is easy in S\&S pipes with rubber ring joints. | Jointing is easy in S\&S pipes using solvents. | Jointing is easy in S\&S pipes with rubber ring joints. | Jointing is expensive and jointing results in beeding which causes obstruction for solids in sewage |
| 19. | Protection to the Pipe | Depending upon the loading conditions, pipes should be protected with either sand or Cement Concrete bedding | Depending upon the loading conditions, pipes should be protected with either sand or Cement Concrete bedding | Pipe should be protected against deflection due to super imposed loads. Pipe embedded portion should be well compacted. | Not required | Pipe should be protected against deflection due to super imposed loads. Pipe embedded portion should be well compacted. |
| 20. | Maintenance | Almost nil if joints are properly made. | Almost nil if proper velocity is maintained. | Pipe may get damaged due to rodding | Minimum | Pipe may get damaged due to rodding |
| 21. | Previous <br> Experience/ <br> Performance | In use for long period and performance is satisfactory | In use for long period and performance is Good | Not common for street sewers but now picking up use to connect houses to sewer | It is durable pipe. Performance is yet to be proven | Recent use started in India. It is durable |
