REGIONAL PLAN-2021
ADDITIONAL AREAS OF NATIONAL CAPITAL REGION

राष्ट्रीय राजधानी क्षेत्र योजना बोर्ड
आवासन और शहरी कार्य मंत्रालय
NATIONAL CAPITAL REGION PLANNING BOARD
MINISTRY OF HOUSING AND URBAN AFFAIRS
Addendum/Modification to the Regional Plan-2021 for NCR notified on 17.09.2005 (Approved in 38th Meeting of the NCR Planning Board held on 13th September, 2019 and notified on 28th November, 2019)
BACKGROUND

1. National Capital Region Planning Board (NCRPB) has prepared Regional Plan-2021 for NCR (RP-2021) under Section 10 of the NCRPB Act, 1985 which was notified on 17th September, 2005.

2. Subsequent to the notification of RP-2021 on 17.09.2005, additional districts namely Bhiwani (including Charkhi Dadri) and Mahendragarh districts of the State of Haryana and Bharatpur district of the State of Rajasthan, were included to NCR vide Government of India, Gazette Notification dated 01.10.2013. Further, the districts of Jind & Karnal of the State of Haryana and Muzzafarnagar district of the State of Uttar Pradesh were included in NCR vide Govt. of India Gazette Notification dated 24.11.2015. The district of Shamli, of the State of Uttar Pradesh was included in NCR vide Govt. of India Notification dated 16.04.2018. The total additional area of NCR is now 20,939 sq.kms. Further, in addition to the existing five Counter Magnet Areas (CMAs) to NCR, four new CMAs, namely, Ambala in Haryana, Dehradun in Uttarakhand, Kanpur in Uttar Pradesh and Jaipur in Rajasthan were also identified and approved by the Board.

3. Subsequent to addition of seven new districts in NCR, the work of preparation of Regional Plan-2021 has been initiated. As part of this, the task of creation of Regional Landuse for the additional areas of NCR was entrusted to National Remote Sensing Centre (NRSC), Govt. of India.

4. At the onset, it may be mentioned that as the notified RP-2021 provides policies and proposals for whole NCR area, these policies and proposals of RP-2021 shall also be applicable to the extended new area of the NCR i.e. Bhiwani (including Charkhi Dadri), Mahendragarh, Jind, Karnal, Bharatpur, Muzzafarnagar and Shamli districts. However, under the provisions of Section 14(1) of NCRPB Act, 1985, modifications can be carried out in the RP-2021 and accordingly, an Addendum to RP-2021, has been prepared with respect to the 7 additional districts, considering and assessing the available information with NCRPB w.r.t. incorporation of additional districts.

Section 14(1) of NCRPB Act, 1985 is reproduced below:

“The Board may, subject to the provisions of sub-section (2), make such modifications in the Regional Plan as finally prepared by it, as it may think fit, being modifications which, in its opinion, do not effect important alterations in the character of the Regional Plan and which do not relate to the extent of land-uses or the standards of population density.”

5. Maps of various chapters of this Addendum to be referred for additional areas of NCR only. However, for old areas of NCR, Regional Plan-2021 notified on 17.09.2005 is to be referred.

Chapter wise addendums/modifications are as follows:
Chapter 1: INTRODUCTION

1. National Capital Region Planning Board (NCRPB) has prepared Regional Plan-2021(RP-2021) for NCR under the provisions of Section 10 of the NCRPB Act, 1985 which was notified on 17th September, 2005.

2. Subsequent to the notification of RP-2021 on 17.09.2005, additional districts namely, Bhiwani (including Charkhi Dadri) and Mahendragarh districts of the State of Haryana and Bharatpur district of the State of Rajasthan, were included to NCR vide Government of India, Gazette Notification dated 01.10.2013. Further, the districts of Jind & Karnal of the State of Haryana and Muzaffarnagar district of the State of Uttar Pradesh were included in NCR vide Govt. of India Gazette Notification dated 24.11.2015. The district of Shamli of the State of Uttar Pradesh was included in the NCR vide Govt. of India Notification dated 16.04.2018. The total additional area of NCR is 20,939 sq.kms.
Chapter 2: THE REGION

Para 2.1 may be read as:

2.1 CONSTITUENT AREAS OF NCR

The Constituent Areas of the National Capital Region are as under:

a) National Capital Territory of Delhi (1,483 sq.kms.). This accounts for 3% of the total area of NCR.

b) Haryana Sub-region comprising of Faridabad, Gurgaon, Rohtak, Sonepat, Rewari, Jhajjar, Palwal, Nuh (Mewat), Panipat, Mahendragarh, Bhiwani (including Charkhi Dadri), Jind and Karnal districts. This accounts for 57.28% (25,327 sq.kms.) of the area of the State and 46% of the area of NCR.

c) Rajasthan Sub-region comprises of Alwar and Bharatpur districts. The area is 4% (13,447 sq.kms.) of the total area of the State and 24% of the area of NCR.

d) Uttar Pradesh Sub-region comprising of seven districts namely, Meerut, Ghaziabad, Gautam Buddha Nagar, Bulandshahr, Baghpat, Muzaffarnagar and Shamli. This accounts for 6% (14,826 sq.kms.) of the area of the State and 27% of the area of NCR.

Thus, the total area of NCR is 55,083 sq.kms. as indicated in the Map 2.1A National Capital Region (including Additional Areas): Constituent Areas.

2.2 PHYSICAL SETTING

Para 1 for section 2.2 be read as:

The National Capital Region lies between 26° 42' and 29° 59' North latitude and 75° 28' and 78° 29' East longitude. The region includes the National Capital Territory of Delhi (earlier Union Territory of Delhi) and parts of the States of Haryana, Rajasthan and Uttar Pradesh. Map 2.2A presents the Physiography and Slope in National Capital Region (including additional areas).

2.3 GEOLOGY - Map 2.3A on Lithology indicates geology of National Capital Region including additional areas of NCR.

2.4 GEOMORPHOLOGY - Map 2.4A on Geomorphic Units indicates geomorphology of National Capital Region including additional areas of NCR.

2.5 HYDROLOGY AND AVAILABILITY OF GROUND WATER - Map 2.5A on Ground Water Prospects indicates availability of ground water.

Chapter 3: AIMS, OBJECTIVES AND POLICY ZONES

The policies for future development of the Regional Plan-2021 given in Para 3.2 will continue for the additional areas of NCR. The additional area falls under the Policy Zone of “Rest of NCR”, and policies at para 3.2.4 with regards to ‘Rest of NCR’ will be applicable to the additional areas of NCR.

Map 3.1 (A) presents the Policy Zones of National Capital Region including additional areas of NCR.

Para 3.2.3: Highway Corridor Zone, following be added

Highway Corridor Zone (HCZ) is proposed along National Highways (NH-44, 52,152, 352, 709 E, 709 A, 334-B, 11,148-B, NH-21 & NH-123 and NH-119 & NH-58) falling in the additional areas of NCR in the districts of Bhiwani (including Charkhi Dadri), Mahendragarh, Jind and Karnal of Haryana sub-region; and Bharatpur district of Rajasthan sub-region; and Muzaffarnagar and Shamli districts of U.P. sub-region.

The policies regarding HCZ and Green Buffer provided in para 3.2.3 of Regional Plan-2021 is applicable for additional areas of NCR, provided that these will not be applicable to existing duly approved Development/Master Plans notified before finalization of this addendum to modification to RP-2021 for additional areas.

3.2.4: Rest of NCR para be read as:

In the Rest of NCR (approximately 51,300 sq.kms.), the basic policy of Regional Plan-2001 for accelerated development of both urban and rural areas will continue. Infrastructure has to be substantially upgraded at local and regional level (both by State and Central Governments) in order to induce the growth in these areas, specifically in the identified settlements i.e., Metro Centres and Regional Centres. This will make them more attractive for locating economic and allied activities and for attracting private sector investment.
Map 3.1A National Capital Region (including Additional Areas): Policy Zones

Note: "Urbanisable area and Controlled area boundaries have been shown as per the Master Plan/Development Plan which might have different perspective year than RF-2021."

Note: Map to be referred for additional areas only.
Chapter 4: DEMOGRAPHIC PROFILE AND SETTLEMENT PATTERN

The following Tables be added in para 4.2.1 below the Table 4.2 of Regional Plan-2021.

4.2.1 A Table 4.2(a) reveals that decadal growth rate of additional areas has decreased, with Bharatpur district experiencing a decrease of 6%. The additional areas of Haryana constitute 21.3% of total population of Haryana.

Table 4.2 (a): Sub-region wise Distribution of Population in Additional Areas of NCR

Source: Census 2001 & 2011

As per 2011, Census, Additional area of NCR in Uttar Pradesh have the maximum density of 1043 pph. While density of additional areas of Haryana is lowest 452 pph, the density of additional Rajasthan district is more than rest of Rajasthan sub-region (Alwar district).

4.2.2 (a) Growth of Population in Additional Areas

Additional area of NCR is experiencing declining in decadal growth rate of population. Jind district has a decline in decadal population growth by as much as 9.3 % followed by Bhiwani (including Charkhi Dadri) (7.8%). The least decline is seen for Karnal district (5%). Only in case of Muzaffarnagar (urban) and Karnal (urban) the decadal growth rate from 2001 to 2011 has increased by 2.5% and 5.7% respectively.

Para 4.2.3 (b) Population Projection for Additional Areas of NCR for 2021

The population projection for additional areas of NCR for the year 2021 is given in Table 4.12 (b). The population of additional areas of NCR is projected to be 154.22 lakhs by 2021. The share of Haryana Sub-region (additional 4 districts): 72.99 lakhs, Rajasthan Sub-region (additional one district): 31.49 lakhs and UP Sub-region (additional 2 districts): 49.73 lakhs by 2021.

Source: Census of India, 2011

There are 27 urban settlements in Uttar Pradesh sub-region, followed by 24 in Haryana sub-region and 11 in Rajasthan sub-region. There are 3 Class-I urban centers in Haryana sub-region, followed by 2 in Uttar Pradesh sub-region and 1 in Rajasthan sub-region.

4.3.2 (a) Rural Settlements in Additional Areas

According to the Census of India (2011), there were 4147 rural settlements of various sizes in NCR as compared to 3924 settlements in 2001. The number of villages increased over the last decade except in Muzaffarnager district. The rural population of NCR which was 78% of the total population of additional area in 2001 has declined to 76% in 2011.

4.5 Proposed Hierarchy of Settlements in Additional Areas of NCR with Population Assignment

Regional Plan-2021 proposed a six-tier settlement system, i.e. Metro Centre, Regional Centre, Sub-Regional Centres, Service Centres, Central Villages and Basic Villages. The same settlement pattern is proposed to be continued for the additional areas. In addition to earlier centers, three Regional Centers i.e. Karnal (M.Cl.+OG) in Haryana sub-region, Muzaffarnagar (NPP) in Uttar Pradesh sub-region and Bharatpur (M.Cl.+OG) in Rajasthan sub-region are proposed in the additional areas of NCR.

Policies with regards to Regional Centre, Sub Regional Centre, Service Centre, Central Village and Basic village as given in para 4.3.6 of the Regional Plan-2021 be applicable for the additional areas of NCR.
Chapter 5: ECONOMIC ACTIVITY AND FISCAL POLICY

5.2.6 Economic Structure of Additional Areas of NCR

5.2.6.1 Work Participation Rate in Additional Areas of NCR

As per the Census of India records, during the decade 2001-11 it is found that amongst the newly added districts, apart from Bharatpur, work participation rate has decreased in all the newly added districts of NCR (refer Table 5.11). Further, while there is slight increase in WPR for females in Bharatpur district, the rate has considerably decreased for other districts’.

5.2.6.2 Structural Composition of Workforce in Additional Areas of NCR

It is observed that majority of the workforce in the newly added districts is engaged either in cultivation & agriculture (primary activities) or in other type of activities. During the decade 2001-2011, it is seen that the share of cultivators has reduced over the time, however, an increase is visible in agricultural labourers and tertiary sector. Table 5.12 provides the percentage share of main workers in the newly added districts by type of economic activities during 2001 and 2011.

Source: Census of India, 2001 & 2011

Census records reveals that among these newly added areas, during the decade 2001-11 share of workers engaged in primary sector decreased in all the districts but a slight increase is depicted in Bhiwani (including Charkhi Dadri) district of Haryana sub-region and Muzaffarnagar district of Uttar Pradesh sub-region. Contrary to this, workforce in secondary sector showed a minor increase in all the newly added districts but negligible decline is seen in Mahendragarh district of Haryana sub-region and Muzaffarnagar district of Uttar Pradesh sub-region. However, workers in tertiary sector increased in all the newly districts except Bhiwani (including Charkhi Dadri) district of Haryana sub-region and Muzaffarnagar district of Uttar Pradesh sub-region.
5.4a Policies and Proposals for Additional Areas of NCR

As the entire additional area falls in the ‘Rest of NCR’, all related policies of ‘Rest of NCR’, under ‘Activity Specific Policies’, and those related to Regional level under section 5.4 of the Regional Plan-2021 be applicable to additional areas of NCR.

5.5a Strategies for Additional Areas of NCR

Strategies suggested for ‘Rest of NCR’, under ‘Activity Specific Strategies, and those related to Regional level, under section 5.5 of the Regional Plan be applicable to additional areas of NCR.
Chapter 6: TRANSPORT

In para 6.2.1 Transport Network following be added for Additional Areas of NCR

i) Road Network

Ten National Highways (NHs) namely NH-44, 52,152, 352, 709E, 709A, 334-B, 11, 148-B and 9 criss-cross the Haryana sub-region, two NHs, namely, NH-119, 58 passing though UP sub-region and two, namely, NH-21 and NH-123 passing through Rajasthan sub-region.

Twenty-three State Highways also serve in straightening the regional road network in the additional areas of NCR

The broad road network in National Capital Region including additional areas of NCR is shown in Map 6.1.A

ii) Rail Network

The additional areas of NCR rail network falls under four zonal railways (Northern, North-Western, North-Central and West-Central).

The rail network in NCR is shown in Map 6.2.A

iii) Airport

The State Government of Haryana intends to set up an international Cargo Airport at Hisar, which is currently a Counter Magnet Area to NCR.

In Rajasthan sub-region, the nearest Domestic airport is Pandit Deen Dayal Upadhyay Airport, Agra which is located at the distance of 58 kms. from Bharatpur. Besides Agra Airport, there are 2 Airports which serves Rajasthan Sub Region, Bharatpur that are Indira Gandhi International Airport, New Delhi located at a distance of 240kms. from Bharatpur and Jaipur International Airport in Jaipur which are located approximately at a distance of 175 kms. from Bharatpur. Apart from nearest airports, Bharatpur is also having Airstrip located 21 kms. from the city of Bharatpur. This Airstrip is only suitable for small aircraft operations only (VIP & private aircraft operations) with total land area allotted of 30 Acres. U.P. sub-region is served by Indira Gandhi International Airport, New Delhi.

Following be added as para 6.9 Policies and Strategies and Action Plan for Additional Areas

The Policies and Strategies given in para 6.5; Transport Plan 2021 given in para 6.6 and Action Plan in para 6.6.5 of the Regional Plan-2021 be applicable to additional areas of NCR.

Chapter 7: POWER

7.2.1.1 Existing Availability & Future Demand for Additional/Newly added Areas of NCR

Census 2011 indicates the status of electricity in the additional areas of Haryana. Cent percent villages that are inhabited are electrified in Karnal (417), Jind (302), Mahendragarh (369) Bhiwani (including Charkhi Dadri) (437) and Bharatpur (1432) while situation needs improvement in Muzaffarnagar (incl. Shamli) districts. Respective State Governments need to assess the power situation of the seven districts as applicable and plan for meeting the future requirements as per improvements planned for the districts.

The energy consumption status of newly added areas indicated below shows maximum growth of energy requirement in Mahendragarh district (24%) followed by Muzaffarnagar district (12%) from 2015 to 2017. Bharatpur need to look into the T&D losses (47%) while energy requirement is maximum for Karnal district.

Source: CEA

7.3 (a) Policies and Proposals

The policies and proposals provided in para 7.3 of the Regional Plan-2021 be applicable to additional areas of NCR.
Chapter 8: WATER

Following may be added in para 8.2 of Regional Plan-2021 as:

8.2 (a) Existing Situation and Issues of Additional Areas of NCR

Amongst the newly added areas, Karnal district receives the maximum average annual rainfall (605.8 mm) while Mahendragarh has the lowest (405.8 mm). As per Ground Water Development Blocks in the additional areas of NCR, except Muzaffarnagar district of Uttar Pradesh sub-region, in all the additional areas of NCR an imbalance between the net annual recharge and withdrawal very clearly mean that groundwater withdrawal significantly exceeds the rate of aquifer recharge. Though, the situation is far better in Muzaffarnagar district where the stage of ground water development is 66%, but that too is higher than the all-India average of 62%. Therefore, ground water resources in NCR including the newly added areas are under pressure due to over-exploitation.

Based on stage of groundwater development, CGWB report, 2011 indicates that in the additional areas of NCR, all the districts have significant number of over-exploited blocks. This clearly underlines the urgent need to increase the ground water recharge to compensate for the annual ground water withdrawal.

Among the newly added areas of NCR, the depth of water table in Bhiwani (including Charkhi Dadri) district drops till 65.97 meters bgl during the pre-monsoon period and the situation is, somewhat same during the post-monsoon period. In rest of the districts, the situation is comparatively better. The situation is a matter of concern for all additional districts apart from Karnal and to an extent Muzaffarnagar, with respect to ground water salinity.

Drinking water has been accorded priority among water uses in successive National Water Policies. As per Census 2011, amongst the new areas added to NCR, 100% population have access to drinking water except Bharatpur district of Rajasthan sub-region where it is only 74.9%. At an average of 52.9% in 2011, tapped water (implying piped water supply) remained the major source of drinking water supply in the newly added districts of NCR. In Bharatpur district and Muzaffarnagar district, hand pumps are a major source of water i.e. 36.6% and 65.2% households respectively.

8.3 (a) Policies and Proposals for Additional Areas of NCR

The policies and proposals provided in Para 8.3 of the Regional Plan-2021 be extended to the additional districts of NCR.

8.4 (a) Plan of action for Additional Areas of NCR

The plan of action and strategies provided in para 8.4 of the Regional Plan-2021 be extended to additional areas of NCR.

Map 8.1A indicates the ground water rechargeable areas in the 7 additional districts. Districts of Mahendragarh, Bhiwani (including Charkhi Dadri), Jind, Karnal of Haryana; Muzaffarnagar & Shamli in Uttar Pradesh and Bharatpur in Rajasthan sub-region.
Map 8.1A: National Capital Region (including Additional Areas): Ground Water Rechargeable Areas

Note: Map to be referred for additional areas only.
Chapter 9: SEWERAGE, SOLD WASTE MANAGEMENT, DRAINAGE & IRRIGATION

In addition to 9.1.2 for NCR as notified upto 2005, 8.2 of Chapter 8 on water of RP-2021, following further:

9.1.2A Existing Situation and Issues w.r.t Sewerage, of Additional Areas

The coverage of sewerage network in various towns of the districts of Karnal, Jind, Mahedragarh and Bhiwani (including Charkhi Dadri) in Haryana, vary from 60% in Loharu town of Bhiwani district, to 90% in towns like Charkhi Dadri, Assandh, Narwana and Mahendragarh. The sewer network coverage in Regional centre in newly added districts of Haryana i.e. Karnal is 76 %. With respect to sewage treatment capacity in regional centres identified in newly added districts, Karnal has capacity of 48 mld while Bharatpur has capacity to handle 13 mld sewage.

As per estimates, i.e Water Demand estimated @ 135 lpcd for Urban and 70lpcd for rural and considering Sewage Generated estimated as 80% of Water Demand, as per CPHEEO norms, the additional areas generate another 828 mld as in 2011 and expected to generate 461 mld by 2021.

9.1.3A Policies and Proposals

All policies and proposals as provided in para 9.1.3 of the Regional Plan- 2021 be applicable to additional areas of NCR.

9.1.4A Plan of action for Additional Areas

The plan of action and strategies provided in para 9.1.4 of Regional Plan-2021 be extended to additional areas of NCR.

9.2.2A Existing Situation and Issues w.r.t Solid Waste Management, of Additional Areas of NCR.

As per estimates, in Table 9.2.1a, Karnal has maximum waste generation due to large urban population amongst the four newly added districts from Haryana, followed by Jind, Bhiwani (including Charkhi Dadri) and Mahendragarh districts. The Table also presents estimated solid waste generation for year 2011 and 2021 as per CPHEEO norms. Overall, as per estimates, the additional areas of NCR together produced about 641 MT/day of solid waste in 2011 and is expected to generate 1034MT/day of solid waste by 2021.

9.2.3A Policies and Proposals

All policies and proposals as provided in para 9.2.3 of the Regional Plan-2021 be applicable to additional areas of NCR.

9.2.4A Plan of action for Additional Areas

The plan of action and strategies provided in para 9.2.4 of the Regional Plan-2021 be extended to additional areas of NCR.

9.3.2A Existing Situation Regarding Drainage of Additional Areas

Jind and Bhiwani (including Charkhi Dadri) district of extended Sub Region are mainly drained through inland drainage tracts’ (Ghaggar Drainage Tract/Internal Drainage Tract). No drainage system is available in Mahendragarh district and the Karnal district drainage is linked and flows in to Yamuna River. Muzaffarnagar district is demarcated by river Ganga in the east and by river Yamuna in the west. In fact, the drainage pattern of the district is strictly governed by these two major rivers. Both the rivers in their respective course flow more or less north to south. Major tributary of Ganga is Solani river. Yamuna has the tributaries named Hindon, Krisni and Hari rivers and the Katna nala. Bharatpur district falls in parts of Ruparail, Banganga and Gambhiri river basins. All the rivers in the district are ephemeral in nature. Gambhiri River flows in the southern part, whereas Ruparail flows in the northern part.

9.3.3A Policies and Proposals for Additional Areas

All policies and proposals as provided in para 9.3.3 of the Regional Plan-2021 be applicable to additional areas.

9.3.4A Plan of action for Additional Areas

The plan of action and strategies provided in para 9.3.4 of the Regional Plan-2021 be extended to additional areas of NCR.
9.4.1 A Existing Situation related to Irrigation of Additional Areas of NCR

In the extended Haryana Sub-Region Karnal, Bhiwani (including Charkhi Dadri) and Mahendragarh and parts of the Jind districts, the water is obtained from the Yamuna Canal System. Whereas in Karnal and Jind district it is through gravity but in case of Bhiwani (including Charkhi Dadri) district and parts of Mahendragarh, it is through the lift system. The irrigation network does not confine to the administrative/district boundaries but through a network of circles serving various districts.

Bharatpur district has been divided into Deeg and Bharatpur divisions. Ndbai, Kumher, Bharatpur and Weir (partially) tehsils come under Bharatpur division comprising 52 dams in which rainy water is being collected. In the months of September and October water from these dams is being released through canals and rivers for irrigation. Under Deeg division come 185 villages of Kaman, Pahari, and Deeg tehsils for irrigation. Irrigation department has constructed 53 kms. long 'Gurgaon canal'. Total 64% of the district area is irrigated and rest of the 36% of the area is unirrigated. The total net irrigated area in the district Bharatpur is 3275.63 sq.kms. and Gross Irrigated area is 3309.95 sq.kms.

Entire district of erstwhile Muzaffarnagar falls between the rivers Ganga and Yamuna. The loamy soils of the area is very fertile. About 80% of the total geographical area of the district is cultivated. The rabi crops are wheat and oil seeds while paddy and pulses are the main kharif crops. The abundantly produced sugarcane is a perennial crop. Muzaffarnagar district is one of the highly developed districts privileged with the Ganga and Yamuna canal systems. Besides the Ganga canal & Eastern Yamuna canals, the irrigational needs are met by ground water. The canal irrigation is maximum in Khatauli block followed by Purkaji block. The canal irrigation is minimum in Budhana block. The area irrigated by tubewells is maximum in Uoon block and minimum in Purkaji block.

9.4.3A Policies and Proposals for Additional Areas

All policies and proposals as provided in para 9.3.3 of the Regional Plan- 2021 be applicable to additional areas.

9.4.4A Plan of action for Additional Areas

The plan of action and strategies provided in 9.4.4 of the Regional Plan-2021 be extended to additional areas of NCR.
Chapter 10: TELECOMMUNICATIONS

10.2(A) The existing status of telecommunication in NCR provided by Department of Telecommunications, Government of India is as under:

(i) Tele-density has crossed 175 (in Delhi) against the targets of 11.5 and 3.0 set in urban and rural areas by March 2007.
(ii) 4G services are available in complete NCR as compared to old technologies such as General Packet Radio System (GPRS) etc.
(iii) BharatNet project is underway which aims to provide high speed data connectivity through optical fibre cable in all 2.5 lakh Gram Panchayats of the country.

10.4.1 Policies and Proposals for Additional Areas

The policies and proposals provided in para 10.4 of the Regional Plan-2021 be extended to additional areas of NCR.
Chapter 11: SHELTER

11.2.1 Issues in Additional Areas of NCR

a. As per Census 2011, there is lower availability of affordable housing in urban areas of Jind and Bhiwani (including Charkhi Dadri) which is indicated by less share of owned houses in urban areas of Bhiwani (including Charkhi Dadri), Jind, Karnal and Muzaffarnagar districts among the newly added districts to NCR.

b. There is significant gap in housing (ranging from about 6000 houses to 45000 houses) in rural areas of the newly added districts except Mahendragarh.

11.3.1 Strategies policies and Proposals for Additional Areas

The policies and proposals provided in para 11.3 of the Regional Plan-2021 be applicable to additional areas of NCR.

11.4.1 Strategies policies and Proposals regarding Slum/ Informal Housing for Additional Areas

The policies and proposals provided in para 11.4 of the Regional Plan-2021 be applicable to additional areas of NCR.
Chapter 12: SOCIAL INFRASTRUCTURE

12.2 (a) Existing Situation of Educational Infrastructure in Additional Areas of NCR

According to the Census, 2011, amongst the newly added districts, the overall literacy rate in Mahendragarh district is highest (77.72%), followed by districts i.e. Bhiwani (including Charkhi Dadri) (75.21%) and Karnal (74.73%) of Haryana sub-region as against all India average of 74 percent. However, newly added areas in U.P. and Rajasthan are less than the all India average percentage i.e. 70%.

12.1(a)

Urban & Regional Development Plans Formulation & Implementation (URDPFI) guidelines for establishing health centers/facilities is given in the table below:

12.4.1 Strategies for Additional Areas

The strategies provided in para 12.4 of the Regional Plan-2021 be applicable to additional areas of NCR.

12.5.3 Strategies regarding ‘Law & Order’ for Additional Areas

The strategies provided in para 12.5.2 of the Regional Plan-2021 be applicable to additional areas of NCR.
Chapter 13: HERITAGE AND TOURISM

In addition to 13.1.1 of Chapter 13 on Heritage and Tourism of RP-2021, following is added:

13.1.1(A): Heritage Sites in Additional Areas of NCR

There are 45 Centrally protected monuments and 36 State protected monuments in the newly added districts of NCR as per Archaeological Survey of India. The district wise number of protected monuments is given in Table 13.1 (A).

13.1.2 (a) Policies and Proposals for the Protection of Man-Made Heritage Sites in Additional Areas of NCR

All policies and proposal as provided in RP-2021, notified in 2005, at para 13.1.2 shall be applicable to newly added areas of NCR.

13.1.3 (a) Natural Heritage in Additional Areas

I. Special protected areas are identified in the additional areas of NCR, include the following:
   i) Keoladeo National Park -Bharatpur, (declared as a national park in 1982 and listed as a World Heritage Site by UNESCO in 1985)
   ii) Bandh Baretha Wild life Sanctuary, Bharatpur
   iii) Bir Bara Van Wildife Sanctuary/ conservation reserve –Jind, Haryana
   iv) Hastinapur Wildlife Sanctuary, Muzaffarnagar, Uttar Pradesh

In addition, components/aspects similar to those covered at para 13.1.3 in the Regional Plan-2021 for old areas of NCR, be protected/conserved in additional areas of NCR as per 13.1.4.

13.1.4 (a) Policies and Proposals for the Protection of Natural Heritage Sites in Additional Areas of NCR

All policies and proposals provided in para 13.1.4 of the Regional Plan-2021 be applicable to additional areas of NCR.

13.2.1 (a) Tourist Sites in Additional Areas of NCR

It is observed that the additional districts of NCR have significant number of tourist attraction points which include places of religious, historic and nature interest.

13.2.2 (a) Policies and Proposals for the Protection of Tourism Sites in Additional Areas of NCR

All policies and proposals provided in para 13.2.2 of the Regional Plan-2021 be applicable to additional areas of NCR.
Chapter 14: ENVIRONMENT

14.1.2 Forest Cover in Additional Areas of NCR

The major natural features identified in the additional areas as environmentally sensitive area such as Aravallis, protected forests, wildlife sanctuaries, national parks, rivers and other water bodies, flood plains, etc. These accommodated a variety of flora and fauna.

In the 7 newly added districts, the forest cover is insignificant, much less than the current national average as well as less than the NCR average. Among the districts, the highest percentage of forest cover is in Bharatpur (4.52%) and the lowest is in Jind (0.8%). The newly added districts in NCR have low forest cover and need lot of attention, in this direction.

14.2 (a) Policies and Proposals for Environment in Additional Areas of NCR

All policies and proposal provided in para 14.2 of the Regional Plan-2021 be applicable to additional areas of NCR.

Notwithstanding anything in above paras, all conservation area boundaries are tentative and subject to verification and detailing by respective State Governments in their Sub-Regional Plans /Development/Master Plans.
Chapter 15: DISASTER MANAGEMENT

15.2.1 Vulnerability and Risk Management in Additional Areas of NCR due to Natural Hazards

A. Earthquake
One of the major fault lines in the region, Mahendragarh – Dehradun fault line, passes through Mahendragarh, Bhiwani (including Charkhi Dadri), Jhajjar, Rohtak, Sonipat and Panipat. Among the 4 newly added districts of Haryana sub-region, Mahendragarh, Karnal and Bhiwani (including Charkhi Dadri) fall under the high risk zone IV and III. Jind is in Zone III of moderate damage risk. There are a few fault lines passing through Mahendragarh district. Parts of Alwar and Bharatpur Districts fall in the high damage risk zone IV and Zone III. Southern part of Bharatpur comes under Zone II of low damage risk. Muzaffarnagar (incl. Shamli) falls in the high damage risk zone IV.

B. Floods
Bhiwani (including Charkhi Dadri) and Mahendragarh are less prone to floods as compared to Jind and Karnal districts. Jind and Karnal districts flood during heavy rains. Flooding in these two districts is also caused due to the improper draining of the water due to its topography. According to the District Disaster Management Plan, Jind district has an average rainfall of 400 mm (2004 – 2012). Karnal district flooding is mainly due to overflow of Yamuna River during heavy rainfall. Karnal has an average rainfall of 325 mm (as recorded from 2008 to 2012 according to district management plan for Karnal). Jind and Karnal districts have several canals passing through the districts, making the districts vulnerable to flooding. Major portion of Bharatpur district falls under the basin of river Banganga which is one of the 15 river basins in the State and hence has a high flood potential. Banganga, Gambir and Ruparel Rivers flow through the district. The district is least affected by droughts among other districts of Rajasthan. According to Disaster Management and Relief Department, Govt. of Rajasthan, the occurrence of drought in Bharatpur is rare. Flooding is a major issue in Muzaffarnagar district due to the presence of several rives. Ganga, Hindon, Solani and Kali rivers flow through the district. During monsoon, these rivers overflow and flood the surrounding areas.

C. Wind
The districts of Mahendragarh, Bhiwani (including Charkhi Dadri), Jind, Karnal and Bharatpur, are at a high wind risk with wind velocities up to 47 m/s.

15.3.1 Policies and Proposals for Additional Areas of NCR
All policies and proposal provided in para 15.3 of the Regional Plan-2021 be applicable to additional areas of NCR.
Chapter 16: RURAL DEVELOPMENT

16.3.1 Policies and Proposals for Additional Areas of NCR

All policies and proposal provided in para 16.3 of the Regional Plan-2021 be applicable to additional areas of NCR.
Chapter 17: REGIONAL LANDUSE

17.2.5 Landuse Analysis of Additional Areas of NCR

Existing Landuse in 2016

NCR Planning Board commissioned a Study on “Creation of Land use for seven additional districts of NCR” to National Remote Sensing Centre (NRSC), Department of Space, Government of India. The existing landuse analysis based on Resourcesat-2 LISS-IV data pertaining to 2016 was carried out at a scale of 1:50,000 by NRSC as part of the Study.

Based on the report of the said Study, the status and assessment of the additional areas of NCR that include the 7 districts (4 from Haryana, 2 from Uttar Pradesh and one from Rajasthan) is as presented below in Table 17.2(a):

Table 17.2 (a): Sub-region wise Land Use in Additional Areas of NCR (Area in sq.kms.)

Note: Map to be referred for additional areas
Map 17.2A National Capital Region (including Additional Areas): Proposed Land Use -2021

Note: Map to be referred for additional areas
Chapter 18: COUNTER MAGNET AREAS

18.3 A Identification of Counter Magnet Areas

Subsequent to the notification of RP-2021, on 17.09.2005, following three cities/towns were identified as Counter-Magnet Areas (CMAs) to NCR, which were approved by the Board in its 31st meeting held on 11.11.2009:

i) Ambala in Haryana

ii) Dehradun in Uttarakhand

iii) Kanpur Nagar in Uttar Pradesh

It was also decided by the Board that the CMAs should not limit to urban area only and development could be proposed in the form of corridors also. Respective State Governments shall notify their respective CMAs and prepare Development Plan/Master Plan and Plan of Action for its implementation.

Thereafter, in its 33rd meeting held on 01.07.2013, Board approved Jaipur as CMA to NCR.

The additional areas of NCR are not covering any of the CMAs. Map 18.1A shows the Counter Magnet Areas identified to NCR.

18.7A Proposals and Recommendations for Additional Identified CMAs

The proposals and recommendations provided in para 18.7 of the Regional Plan-2021 be applicable to additional identified CMAs to NCR.
Map 18.1A National Capital Region: Counter Magnet Areas
Chapter 19: IMPLEMENTATION STRATEGIES, MANAGEMENT STRUCTURE & RESOURCE MOBILIZATION

Implementation Strategies, Management Structure and Resource Mobilization provided in para 19.1, para 19.2 and para 19.3 of the Regional Plan-2021 respectively be applicable to additional areas.
