V. AREA OF NCR

National Capital Region (NCR) is a unique example of inter-state regional development planning for a region with NCT-Delhi as its core. The National Capital Region as notified covers an area of about 34,144 sq kms falling in the territorial jurisdictions of four State Governments namely, National Capital Territory of Delhi, Haryana, UP, and Rajasthan and constitutes about 1.60% of the country's land area. VI. COUNTER MAGNET AREAS

The NCR Planning Board Act, 1985, under Section 8 (f), empowers the Board to select any area outside the NCR having regard to its location, population and potential for growth as a 'Counter Magnet Area' in consultation with the State Government concerned with a view to achieving the objectives of the Regional Plan.

As per RP-2001, the NCR Planning Board has identified the following five counter magnet areas:

- Hisar in Haryana
- Bareilly in Uttar Pradesh
- Kota in Rajasthan
- Patiala in Punjab
- Gwalior in Madhya Pradesh

The Counter-Magnets are envisaged to play two distinctive mutually complementary roles viz.

- "As interceptors of migratory flows into NCR, which may escalate, as the accelerated development of NCR would provide a pull to migrants from the less developed adjoining areas; and
- As Regional Growth Centres, which would be able to achieve a balanced pattern of urbanization in the Region of their own setting over a period of time."

The Regional Plan-2021 has continued the policy of development of Counter Magnet Areas. Based on the recommendations of the Study on "Counter Magnet Areas to Delhi and NCR", NCR Planning Board in the 32nd Meeting held on 22.3.2012 approved the following cities/towns as Counter-Magnet Areas for NCR for final notification of the modifications in the Regional Plan 2021.

NCR Planning Board prepared a Regional Plan with the perspective year 2021 for the National Capital Region, which was notified on 17.09.2005.

The Regional Plan-2021 for NCR provides a model for sustainable development of urban and rural settlements to improve quality of life as well as a rational regional land use pattern to protect and preserve good agricultural land, environmentally sensitive areas and utilize unproductive land for urban areas through an inter-related policy framework relating to settlement systems, economic activities, transportation, telecommunication, regional land use, infrastructural facilities such as power and water, social infrastructure, environment, disaster management, heritage and tourism.

The vision of the Plan is to develop the entire NCR as a region of global excellence. The Plan aims to promote economic growth and balanced development of the Region and seeks to attain these through (a) providing suitable economic base for future growth by identification and development of regional settlements capable of absorbing the economic development impulse of Delhi; (b) providing efficient and economic rail and road based transportation networks (including mass transport systems) well integrated with the land use patterns to support balanced regional development in such identified settlements; (c) minimizing the adverse environmental impact that may occur in the process of development of the NCR; (d) developing selected urban settlements with urban infrastructure facilities such as transport, power, communication, drinking water, sewerage and drainage comparable with Delhi; (e) providing a rational land use pattern; and (f) promoting sustainable development in the region for improving the quality of life.

In the Regional Plan -2021 for NCR, population projections for all Sub-regions have been made for 2021. The NCR's population is likely to reach 486.19 to lakh by 2011 and 641.38 lakh by 2021. 4.	Rajasthan Sub-region	37.91	36.72
5.	NCR	486.19	460.47

- Proposes Development of Metro and Regional Centres as powerful growth nodes to attract major activities
- Provide regional transport linkages and Mass Commuter System
- Construction of peripheral expressways and orbital rail corridor around Delhi
- Development of core urban infrastructure (transport, power, water supply, sewerage, drainage) in NCR towns
- Development of the region's economy through Model Industrial Estates, Special Economic Zones outside NCT-Delhi

The Regional Plan-2021 for NCR has proposed a six tier Settlement System consisting of Metro Centres, Regional Centres, Sub-Regional Centres, Service Centres, Central Villages and Basic Villages. In view of the urbanization and growth in this area, land is facing a threat by way of haphazard unplanned development, unauthorized construction and encroachments. In order to protect conversion of good agricultural land for non-

agricultural uses, there is a dire need of early preparation of various master plans at different level for both urban settlements as well as rural settlements following policies laid down in the Regional Plan-2021 for NCR and with a focus to have a rural-urban continuum. In addition to this, to have balanced development of the NCR, it is also required that various proposals/strategies/projects to provide the essential services/core infrastructure like shelter, water, sewerage, sewage treatment, solid waste management, drainage, power, transport, etc. be also implemented in a time bound manner by the constituent State Governments, Central Ministries and their concerned Departments/Agencies. Further new approaches and innovative techniques are required to be adopted by the concerned Agencies to improve & enhance the availability of water & power. The ground water recharging and water harvesting are required to be integrated in the building byelaws and amendments are also required to be carried out in various Town Planning Acts by the Constituent State Governments for conserving the water recharging areas. Implementation of the various policies and proposals of Regional Plan-2021 for NCR will have to be done by the Constituent State Governments & Central Ministries through their various Departments/Agencies in time-bound manner.

c) Road Network

Peripheral Expressway around Delhi

Five National Highways, namely, NH-1, NH-2, NH-8, NH-10 & NH-24 converge onto the Ring Road in the NCT Delhi and result in heavy congestion not only on the Ring Road but also on major roads in urban area of Delhi. The role of these National Highways changes to that of urban arterial roads when they are part of Delhi road network. Much of the congestion is caused by the vehicles not destined to Delhi but transiting through Delhi in the absence of any alternate routes linking to other National Highways.

In order to provide by-passes, Peripheral Expressways around Delhi were proposed in the Regional Plan 2021. The western half of this bypass road linking NH-1 at Kundli in the North to NH-2 at Palwal in the South via NH-10 & NH-8 at western periphery of Delhi has been designated as the Western Peripheral Expressway. The eastern half of this

bypass road linking NH-1 at Kundli in the North to NH-2 at Palwal in the South via NH-24 on the Eastern side of Delhi has been designated as the Eastern Peripheral Expressway.

Peripheral Expressway	Status
Western Peripheral Expressway	The work has been awarded to the concessionaire on 31.1.2006 for the concession period of 23 years and 9 months (including three years of construction period) by Government of Haryana. Total length of this Expressway is 135.65 kms. It is being implemented by the Govt. of Haryana and monitored by Ministry of Road Transport and Highways which is nodal Ministry for the implementation of this project. Completion date for this project has been extended to December 2013
Eastern Peripheral Expressway	Detailed Project Report for the Eastern Peripheral Expressway has been prepared. Land acquisition is in progress. The implementation of Eastern Peripheral Expressways is being done by NHAI, Ministry of Road Transport and Highways.
